

Chemistry In Emerging Technologies Lectures

Fall 2016 Lectures

Nazareth College - Peckham Hall, Room 10-12
4245 East Avenue, Pittsford, NY

Chemistry, the “*Central Science*”, has played a critical role in the economic development of Rochester. The long history of successful development of innovative technologies continues today, both at established companies and universities as well as at many area start-ups. This lecture series will highlight emerging technologies with significant chemical components that are being developed in the Rochester area. The lectures in the Fall 2016 program, will discuss the basic science and the target products of two technologies in the energy and medical diagnostic areas. These free lectures are open to the general public - including students looking for insight into future career opportunities.

7:00 pm: Lectures

Monday Oct. 3	<p><i>Ionic Liquid Electrolytes for Safer Li-Ion Batteries</i></p> <p>Dr. Surya Moganty, CTO, NOHMs Technologies, Inc. (www.nohms.com)</p>
Monday Nov. 7	<p><i>Advances in Immunoassays for Clinical Diagnostics</i></p> <p>Mr. Philip Hosimer, Senior Principal Scientist Ortho Clinical Diagnostics</p> <p>8:15 – 9:30 pm: Reception /Poster Session – Peckham Hall Lobby</p>

Further information on these lectures, poster submissions and other Rochester ACS Section events is available at www.Rochester.sites.ACS.org
